

# Laos Peoples Democratic Republic – Luang Prabang Province Global Youth Tobacco Survey (GYTS)

## FACT SHEET . . . . .

The Laos Peoples Democratic Republic - Luang Prabang Province GYTS includes data on prevalence of cigarette and other tobacco use as well as information on five determinants of tobacco use: access/availability and price, environmental tobacco smoke exposure (ETS), cessation, media and advertising, and school curriculum. These determinants are components Laos Peoples Democratic Republic could include in a comprehensive tobacco control program.

The Laos Peoples Democratic Republic - Luang Prabang Province GYTS was a school-based survey of students in

Grades 2-4, conducted in 2003. A two-stage cluster sample design was used to produce representative data for all of Luang Prabang Province. At the first stage, schools were selected with probability proportional to enrollment size. At the second stage, classes were randomly selected and all students in selected classes were eligible to participate. The school response rate was 100%, the student response rate was 91.9%, and the overall response rate was 91.9%. A total of 2558 students participated in the Laos Peoples Democratic Republic - Luang Prabang Province GYTS.

### Prevalence

- 7.4% of students had ever smoked cigarettes (Boys = 11.5%, Girls = 1.2%)
